SECURICALL
INTEGRATED SECURITY SYSTEMS

Security and IP Systems in Education

Education facilities can be a target for vandalism, theft and other unlawful activities, yet tackling this problem can be a burden on resources and budgets. Integrating security and establishment administration functions can be a way to make each system more cost effective, giving a better Return on Investment.

SECURICALL bring together years of experience of integrating Security and synergetic systems, coupled with a full understanding of Smartcards / Biometrics and data networking, resulting in the development of a highly effective solutions model. Out of hours security can be provided by a combination of intruder detection and CCTV. The use of CCTV systems is generally accepted as a deterrent to behaviour crime.

Added protection to staff and students can be obtained by using Access Control systems to allow control of access to the buildings in general and 'high value areas such as computer rooms. The use of Smartcard technology offers other benefits in addition to access control. The card can contain Access credentials, photo, and establishment logo, and can be used for Student Registration and to purchase meals in canteens or even for PC logons etc.

System Selection

- ID Badges
- Smart Cards
- Electronic Registration
- Cashless Payment
- Library Systems
- Photocopier Control
- System Integration
- Disabled & Refuge Alarm

- IP CCTV
- Access Control
- Intruder Alarms
- Panic Alarms
- Fire Detection
- Intercoms
- Perimeter Detection
- Barriers & Gates

Key features & benefits

Accessibility
IP CCTV delivers secure, real-time images of an incident or emergency that can be viewed remotely over a secure internet connection, or from a desktop PC in the building itself.

Scalability
All SECURICALL IP Security Systems are eminently scaleable from entry-level stand-alone systems to fully integrated multiple campus solutions.
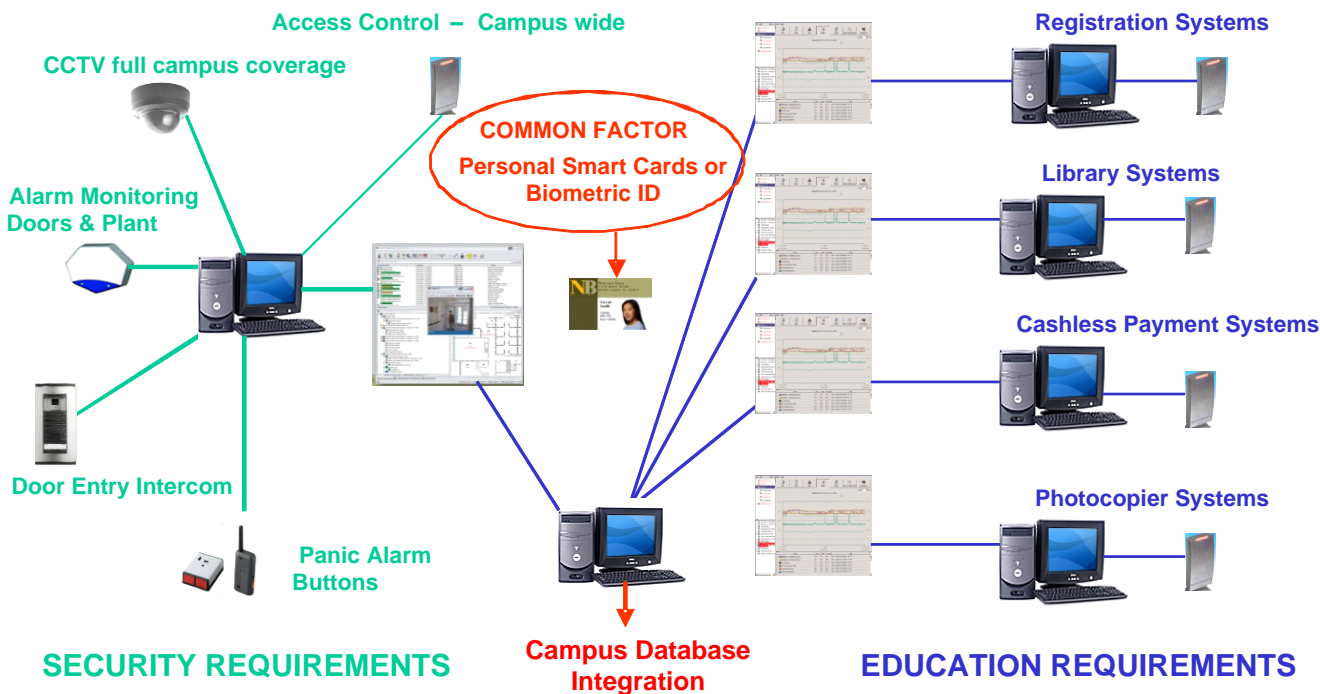

Convergence
The emergence of Internet Protocol (IP) as a standard for more than just email and the Internet has triggered a surge in the capacity for interaction with customers, students and employees alike. SECURICALL can assist by using your existing communication channels and matching with the best-in-class systems available.

Database Integration
Integrating each system with the facility's database improves efficiency. E.g. Tribal, EBS,Agresso QL, Scientia Syllabus, Infonic Celcat

Managed Services
Managing all aspects of your own security can be daunting to those with no prior experience or not wanting to tie up expensive resource. SECURICALL will assist you with managed services, exclusively designed to make running your system as easy and cost effective as possible.

Datasheet

CCTV full campus coverage

Access Control – Campus wide

COMMON FACTOR
Personal Smart Cards or Biometric ID

Registration Systems

Alarm Monitoring Doors & Plant

Library Systems

Cashless Payment Systems

Door Entry Intercom

Photocopier Systems

Panic Alarm Buttons

SECURITY REQUIREMENTS

Campus Database Integration

EDUCATION REQUIREMENTS

Ongoing support

All SECURICALL's Security Systems are fully supported by the company's dedicated engineering and service teams who have extensive experience in the integration of IP Security, Smart Card /Biometric based systems and data networking.

Return on Investment

Many campuses will already have much of the infrastructure in place to support IP Security Systems, including an IP network and broadband connectivity, thus helping to make IP Security and converged systems a realistic and affordable solution.
With a commitment to deliver high-value integrated solutions, the smart design approach adopted by **SECURICALL** reduces capital expenditure and on-going service costs.

Why Securicall?

Securicall is a market leader in the provisioning of security solutions operating over conventional and data networks.
With unique understanding in this arena, Securicall delivers elegant, end-to-end fully integrated solutions with guaranteed performance - and quick return on investment.
Based from our Regional Offices, Securicall can provide planning, design, installation and support to organisations across the UK.
